Tree Line ESG & Impact Policy

Tree Line ESG & Impact Policy

I. Introduction

Tree Line Capital Partners, LLC (“Tree Line”) is a private credit asset management firm focused on direct lending to the lower middle-market.

As a lower middle-market direct lender, Tree Line maintains direct relationships with hundreds of private equity firms and screens thousands of investment opportunities. We have integrated an environmental, social and governance (“ESG”) screening policy and responsible investing principles across our investment processes. In addition, certain funds have impact strategies and as a firm TreeLine has made material impact commitments.

We believe it is our duty both as investors and citizens to not only acknowledge the impact of our investments on society and the environment, but to actively promote the success of those businesses that make positive change in the world possible.

We have structured our ESG and Impact initiatives across three major platforms.

- **Corporate Impact Initiatives** include Tree Line’s corporate capital commitments and volunteerism to environmental and social

causes. Tree Line is a member of *1% for the Planet* and contributes 1% of its management company revenue to environmental non-profits and causes. This contribution is accounted for in both dollars and volunteerism. Additionally, Tree Line will provide employees with an opportunity donate one day per month to volunteer and work with approved non-profits and organizations.

- **ESG Investing.** We screen every transaction for positive and negative ESG factors as noted on Exhibit “A”. Tree Line has also become a signatory to the United Nations Principles for Responsible Investment.
- **Impact Strategies** is embedded within certain funds at Tree Line. Our unique access to the lower middle-market creates an opportunity to utilize our platform to drive a positive impact and deliver growth capital to underserved markets.

CORPORATE IMPACT

- *1% for the Planet* member contributing 1% of management company revenue to environmental causes
- Target participation in Social Reform programs
- Tree Line volunteering program allowing employees to spend one day per month on charitable causes

ESG Investing

- Integrated across Tree Line platform with positive & negative investment criteria screening
- Principles for Responsible Investment Signatory

IMPACT INVESTING

- Deliver capital to the underserved lower middle-market
- SBIC Fund mandates 25% of investment to LMI (low or moderate income) zones
- Drive job growth and target diversity
- SBIC Fund

II. ESG & Impact Objectives

Tree Line's ESG & Impact objectives are designed to be integrated into both our corporate culture as well as our investment processes. Key objectives are to:

- Create a corporate program and culture that delivers the strength of our team, platform and resources to address challenges confronting us in today's world.
- Promoting investment opportunities with positive ESG factors and avoiding those with negative ESG factors, as described in greater detail below.
- Ensure portfolio companies align with Tree Line's values.

III. Corporate Impact

Tree Line promotes action across our team on two major initiatives. Our policy allows employees to contribute one day per month of their time towards volunteering, charitable work or other approved causes. We will measure our contributions across the variety of non-profits and organizations we work with and share these results in our Annual Report.

Tree Line has highlighted two primary areas for employee involvement in our corporate impact program.

- **1% for the Planet** – Tree Line is a member of this organization and donates up to 1% of its annual revenue to environmental causes and non-profit organization. Tree Line is able to contribute up to 25% of its donation through volunteering. Tree Line has a task force in place to research, screen and coordinate with non-profits receiving our donations and coordinate volunteering activities for team members and/or the firm.
- **Social Reform** – Tree Line has a task force in place to research opportunities for team members and/or the firm to volunteer for causes focused on social reform. Our objectives are focused on children, students and other organizations that are focused on the advancement of minorities and disadvantaged communities.
- **Other Activities** – Tree Line will approve employee and/or firm involvement in a variety of other causes on an-hoc basis.

IV. ESG Investing

Tree Line has integrated its ESG screening policy and responsible investing principles across its investment processes. We are additionally a signatory to the Principles for Responsible Investment. The following principles guide Tree Line's approach to ESG integration:

- **Active Stakeholder Communication** - We seek to maintain an active dialogue with our stakeholders to incorporate relevant ESG risk factors into our current processes.
- **Avoid Harm** – We seek to avoid investments with companies whose products or services cause meaningful environmental or social harm. Specifically, Tree Line's policy precludes it from investing in businesses with the following characteristics: fossil fuels extraction and refining, metals and mining, thermal coal power generation, high potential soil, air or water contamination, non-renewable resource consumption, operators with significant GHG emissions, weapons

manufacturing, pornography and adult entertainment, tobacco products, illicit drugs, nuclear energy or predatory consumer finance (payday lending).

- **Promote Positive Practices** – We seek to promote positive environmental and social practices through our direct engagement with existing and prospective portfolio companies and further utilize our due diligence and structuring discussions to discuss such practices.
- **Measure ESG Performance** – We seek to measure changes in ESG performance over the course of an investment to guide future investment decision making with any existing portfolio company.
- **Transparency** - We provide an annual update on all ESG activities and include an overview of our policy for all stakeholders to review on our website.

V. Implementation

Tree Line's ESG & Impact Policy is implemented directly into our investment processes, governed through active monitoring at multiple touchpoints throughout a deal's life and reported annually to all stakeholders in our Annual Report.

Tree Line utilizes the following screening methodology supported by a tailored ESG Impact Matrix to identify specific areas of focus and concern.

Negative Screen

Companies that have the potential to cause harm by certain products, services or operating procedures to the environment or society.

Positive Screen

Companies that operate sustainably, maintain diversity or promote positive ESG best practices.

Diligence Escalation

Certain investments will require additional diligence to determine their fit within our ESG screening policy and responsible investment principles. Our Investment and Risk Management committees are responsible for the evaluation of such escalated issues.

VI. Governance & Reporting

We have developed an ESG & Impact monitoring and governance framework, illustrated below, that is integrated across the Tree Line platform.

Design/Oversight	Dillgence Actions	Reporting/Monitoring
<ul style="list-style-type: none"> • Maintain an ESG framework that is relevant to current environmental and social issues. • Utilize our leadership committees to provide proper oversight and integration of our policy. 	<ul style="list-style-type: none"> • Screen for ESG concerns and opportunities for influence. • Develop appropriate mitigants or strategies where applicable. • Document action items and monitoring plans where applicable. 	<ul style="list-style-type: none"> • Include ESG metrics and results within Annual Report. • Monitor portfolio performance to assess changes in ESG matters.

Investment & Risk Management Committees

The **Investment Committee** is responsible for properly screening each investment applying the responsible investing principles and ensuring compliance with any impact strategy. The Investment Committee reviews every deal a minimum of three times throughout a diligence process and a specific ESG review is required at the screening stage, underwriting stage and funding stage.

The **Risk Management Committee** will monitor the overall effectiveness of this ESG & Impact Policy and provide an annual review of the policy. Additionally, the committee will ensure implementation at the fund level and the individual deal level.

Impact Committee

The Impact Committee works with our approved non-profit partners to carry out our corporate commitments and strategies.

Tree Line Team

The Tree Line team will contribute to our Impact activities across the firm as well as be actively involved in the screening, diligence and monitoring of portfolio companies.

Exhibit A

IMPACT MATRIX

Tree Line's ESG screening matrix

The positive and negative factors below are used as a guide to evaluate new investment opportunities. Tree Line specifically prohibits investments in a number of these areas outlined on pages 3 and 4 in this policy.

POSITIVE

NEGATIVE

-
